No. 13. An inquiry into the composition of dietaries; with special reference to the dietaries of munition workers. 1917.

No. 14. Special committee upon the standardisation of pathological methods; No. 1. The Wassermann test. 1918.

No. 15. A study of 1,300 convalescent cases of dysentery from home hospitals; with special reference to the incidence and treatment of amoebic dysentery carriers. 1918.

No. 16. A report on the causes of wastage of labour in munitions factories employing women. 1917.

No. 17. A report upon the seasonal outbreak of cerebro-spinal fever in the Navy at Portsmouth, 1916-17; the treatment of cerebro-spinal meningitis by anti-meningococcus serum at the Royal Naval Hospital, Haslar, 1915-17. 1917.

No. 18. An investigation into the epidemiology of phthisis in Great Britain and Ireland. 1917.

No. 19. The laboratory diagnosis of gonococcal infections; methods for the detection of spirochaetes.

No. 20. A study of social and economic factors in the causation of rickets. M. Ferguson. 1917.

No. 21. The diagnostic value of the Wassermann test. 1918.

No. 22. An inquiry into the prevalence and aetiology of tuberculosis among industrial workers; with special reference to female munition workers. 1918.

No. 23. A report on the investigation of an epidemic caused by *Bacillus aertrycke*. 1918.

No. 24. An analysis of the results of Wassermann reactions in 1,435 cases of syphilis or suspected syphilis. 1919.

No. 25. Reports of the special investigation committee on surgical shock and allied conditions, No. 1-7. [1919]

No. 26. Traumatic toxæmia as a factor in shock. 1919.

No. 27. Blood volume changes in wound shock and primary hæmorrhage. 1919.

No. 28. The sense of stability and balance in the air. 1918.

No. 29. A contribution to the study of chronicity in dysentery carriers. 1918.

No. 30. An investigation of the Flexner-Y group of dysentery bacilli. 1918.

No. 31. Alcohol; its absorption into and disappearance from the blood under different conditions. E. Mellanby. 1919.

No. 32. The science of ventilation and open-air treatment. pt 1. L. Hill. 1919.

No. 33. Pulmonary tuberculosis: mortality after sanatorium treatment. 1919.

No. 34. The influence of alcohol on manual work and neuromuscular co-ordination. 1919.

No. 35. The reaction of media. 1919.

No. 35. Revised. The reaction of culture media. 1927.

No. 36. Studies of influenza in hospitals of the British armies in France, 1918. 1919.

No. 37. The effect of diminished tension of oxygen, with special reference to the activity of the adrenal glands; the ear in relation to certain disabilities in flying. 1919.

No. 38. Report on the present state of knowledge concerning accessory food factors (vitamines) 1919.

No. 39. Report on the anaerobic infections of wounds and the bacteriological and serological problems arising therefrom. 1919.

No. 40. Studies of bacillary dysentery occurring in the British forces in Macedonia. 1919.

No. 41. An investigation into the ultimate results of the treatment of syphilis with arsenical compounds; a clinical study of the toxic reactions which follow the intravenous administration of "914". 1919.

No. 42. A study of the serological races of the Flexner group of dysentery bacilli. 1919.

No. 43. Albuminuria and war nephritis among British troops in France. 1919.

No. 44. Reports of the special committee upon the manufacture, biological testing, and clinical administration of salvarsan and of its substitutes, No. 1. 1919.

No. 45. Unsuspected involvement of the central nervous system in syphilis. 1919.

No. 46. An investigation into the epidemiology of phthisis in Great Britain and Ireland. pt 3. 1919.

No. 47. The accuracy of Wassermann tests, applied before and after death, estimated by necropsy; the Wassermann test applied before death. 1919.

No. 48. A report on the probable proportion of enteric infections among undiagnosed febrile cases invalided from the Western front since Oct. 1916. 1920.

No. 49. On the destruction of bacteria in milk by electricity. 1920.

- No. 50. Cerebro-spinal; studies in the bacteriology, preventive control, and specific treatment of cerebro-spinal fever among the military forces, 1915-19. 1920.
- No. 51. The laboratory diagnosis of acute intestinal infections, including the principles and practice of the agglutination test. 1920.
- No. 52. The science of ventilation and open-air treatment. pt 2. I. Hill. 1920.
- No. 53. The medical problems of flying; including reports Nos 1-8 of the Air medical investigation committee. 1920.
- No. 54. First report of the committee upon injuries of the nervous system; the diagnosis and treatment of peripheral nerve injuries. 1920.
- No. 55. Reports of the Salvarsan committee. 1920.
- No. 56. The effects of alcohol and some other drugs during normal and fatigued conditions. 1920.
- No. 57. Studies in wound infections. 1920.
- No. 58. T. N. T. poisoning and the fate of T. N. T. in the animal body. 1921.
- No. 59. A report on the occurrence of intestinal protozoa in the inhabitants of Britain; with special reference to *Entamoeba histolytica*. 1921.
- No. 60. The use of death-rates as a measure of hygienic conditions. 1922.
- No. 61. Experimental rickets. E. Mellanby. 1921.
- No. 62. Medical uses of radium; studies of the effects of gamma rays from a large quantity of radium. By various authors. 1922.
- No. 63. Studies in the aetiology of epidemic influenza. J. McIntosh. 1922.
- No. 64. Catalogue of the national collection of type cultures. 1922.
- No. 65. First report of the Miners' nystagmus committee. 1922.
- No. 66. Toxic effects following the employment of arsenobenzol preparations. 1922.
- No. 67. Report on artificial pneumothorax. L. S. T. Burrell, & A. Salisbury MacNalty. 1922.
- No. 68. Rickets; the relative importance of environment and diet as factors of causation: an investigation in London. H. G. Mann. 1922.
- No. 69. Reports on biological standards; on the physiological standardisation of extracts of the posterior lobe of the pituitary body. J. H. Burn, & H. H. Dale. 1922.
- No. 70. The structure of teeth in relation to dental disease. J. H. Mummery. 1922.
- No. 71. The aetiology and pathology of rickets from an experimental point of view. V. Korenchevsky. 1922.
- No. 72. The acid-base equilibrium of the blood. 1923.
- No. 73. The Shick test; diphtheria and scarlet fever; a study in epidemiology. S. F. Dudley. 1923.
- No. 74. The kata-thermometer in studies of body heat and efficiency. 1923.
- No. 75. The Shick test; diphtheria and scarlet fever; a study in epidemiology. S. F. Dudley. 1923.
- No. 76. Tuberculosis in insured persons accepted for treatment by the City of Bradford health committee. H. Vallow. 1923.
- No. 77. Studies of rickets in Vienna, 1919-22. 1923.
- No. 78. The serum diagnosis of syphilis, the Wassermann and Sigma reactions compared. 1923.
- No. 79. Bacteriological and clinical observations on pneumonia and empyemata; with special reference to the pneumococcus and serum treatment. E. E. Glynn. 1923.
- No. 80. Second report of the Miners' nystagmus committee. 1923.
- No. 81. Child life investigations; the effect of maternal social conditions and nutrition upon birth-weight and birth-length. M. B. Murray. 1924.
- No. 82. Child life investigations; maternal syphilis as a cause of death of the foetus and of the new-born child. J. N. Cruickshank. 1924.
- No. 83. Tuberculosis of the larynx; 10 years experience in a sanatorium. Sir St C. Thomson. 1924.
- No. 84. The application of the Air Force physical efficiency tests to men and women. L. D. Cripps. 1924.
- No. 85. An inquiry into the after-histories of patients treated at the Brompton Hospital Sanatorium at Primley, during the years 1905-14. Sir P. Horton-Smith Hartley, R. G. Wingfield, & J. H. R. Thompson. 1924.
- No. 86. Child life investigations; the estimation of foetal age, the weight and length of normal foetuses, and the weights of the foetal organs. 1924.
- No. 87. Reports of the committee upon quantitative problems in human nutrition; report on the nutrition of miners and their families. 1924.
- No. 88. Reports of the committee upon injuries of the nervous system; 2: injuries of the spinal cord and cauda equina. 1924.
- No. 89. Report on miners beat knee, beat hand, and beat elbow. E. L. Collis, & T. L. Llewellyn. 1924.
- No. 90. Medical uses of radium; summary of reports from research centres for 1923. 1924.
- No. 93. Experimental rickets. E. Mellanby. 1925.
- No. 95. Internal migration and its effects upon the death-rates; with special reference to the County of Essex. A. B. Hill. 1925.
- No. 96. Clinical comparisons of quinine and quinidine. 1925.
- No. 97. Reports of the committee for the investigation of dental disease in children. 1925.
- No. 98. Studies of the viruses of vaccinia and variola. M. H. Gordon. 1925.
- No. 99. An investigation into the statistics of cancer in different trades and professions. M. Young, & J. Brownlee. 1926.
- No. 100. Methods of investigating ventilation and its effects. H. M. Vernon [et al.] 1926.
- No. 101. Poverty, nutrition, and growth; studies of child life in cities and rural districts of Scotland. D. N. Paton, & Findlay, L. 1926.
- No. 102. Medical uses of radium; summary of reports from research centres for 1924. 1926.
- No. 103. Further studies of the salmonella group. P. B. White. 1926.
- No. 104. Reports of the committee upon the physiology of vision; illumination and visual capacities. 1926.
- No. 105. Diets for boys during the school age. H. C. C. Mann. 1926.
- No. 106. Small-pox and climate in India, forecasting of epidemics. Sir Leonard Rogers. 1926.
- No. 107. The effect of treatment on the Wassermann reactions of syphilitic patients. E. Glynn, R. E. Roberts, & M. Bigland. 1926.
- No. 108. The Sheffield outbreak of epidemic encephalitis. 1924.
- No. 109. Child life investigations; a clinical and pathological study of 1,673 cases of dead births and neo-natal deaths. E. L. Holland, & J. E. Lane-Claydon. 1926.
- No. 110. The legibility of print. R. L. Pyke. 1926.
- No. 111. The spread of droplet infection in semi-isolated communities. S. F. Dudley. 1926.
- No. 112. Medical uses of radium, summary of reports from research centres for 1925.
- No. 113. Spirochaetal jaundice. G. Buchanan. 1927.
- No. 114. Child life investigations; social conditions and acute rheumatism. 1927.
- No. 115. The prevention of diphtheria. J. G. Forbes. 1927.
- No. 116. Medical radium; summary of reports from research centres for 1926. 1927.
- No. 117. The toxemia of pregnancy; a clinical and biochemical study. J. N. Cruickshank, J. Hewitt, & K. L. Couper. 1927.
- No. 118. Child life investigations; the cause of foetal death in 144 cases. A. C. Palmer. 1928.
- No. 119. A study of some organic arsenical compounds; with a view to their use in certain streptococcal infections. L. Colebrook. 1928.
- No. 120. An inquiry into the relationship between housing conditions and the incidence and fatality of measles. J. L. Halliday. 1928.
- No. 121. Borna disease and enzootic encephalo-mylitis of sheep and cattle. S. Nicolau, & I. A. Galloway. 1928.
- No. 122. The intradermal tuberculin test in cattle. J. B. Buxton, & A. S. MacNalty. 1928.
- No. 123. Iodine in nutrition; a review of existing information. J. B. Orr, & I. Leitch. 1929.
- No. 124. The meningococcus. E. G. D. Murray. 1929.
- No. 125. A study of intracranial surgery. H. Cairns. 1929.
- No. 126. Medical uses of radium; a summary of reports from research centres for 1927. 1928.
- No. 127. Dark adaptation; a review of the literature. D. Adams. 1929.
- No. 128. Toxicity tests for novarsenobenzene; neosalvarsan. F. D. Durham, J. H. Gaddum, & J. E. Marchal. 1929.
- No. 129. The Wassermann test; technical details of No. 1 method M. R. C. (modified) E. J. Wyler. 1929.
- No. 130. Reports of the committee upon the physiology of vision. M. D. Vernon, & R. W. Pickford. 1929.
- No. 131. Irradiation and health. D. Colebrook. 1929.
- No. 132. The treatment of syphilis; a survey of records from St Thomas's Hospital. L. W. Harrison. 1929.
- No. 133. Reports of the committee upon the physiology of vision. N. M. S. Langlands. 1929.
- No. 134. The adaptation of the eye; its relation to critical frequency of flicker. R. J. Lythgoe, & K. Tansley. 1929.
- No. 135. The carbohydrate contents of foods. R. A. McCance, & R. D. Lawrence. 1929.
- No. 136. Some experiments on peripheral vision. M. Salaman. 1929.
- No. 137. Scarlet fever; diphtheria, and enteric fever 1895-1914: a clinical statistical study. E. W. Goodall, M. Greenwood, & W. T. Russell. 1929.
- No. 138. The preparation of catgut for surgical use. W. Bulloch, L. H. Lampitt, & J. H. Bushill. 1929.
- No. 139. Re-determination of the trichromatic mixture data. W. D. Wright. 1929.
- No. 140. Diet and the teeth, an experimental study. M. Mellanby. 1929.
- No. 141. The tannic acid treatment of burns. W. C. Wilson. 1929.
- No. 142. A classification of Bright's disease. D. S. Russell. 1929.
- No. 143. Diagnostic value of the vaccinia variola flocculation test. W. L. Burgess, J. Craigie, & S. J. Tulloch. 1929.
- No. 144. Medical uses of radium; summary of reports from research centres for 1928. 1929.
- No. 145. Child investigations; the causes of neo-natal death. J. N. Cruickshank. 1930.

- No. 146. The antiscorvy vitamin in apples. M. F. Bracewell, E. Hoyle, & S. S. Zilva. 1930.
- No. 147. The electrocardiogram. W. H. Craib. 1930.
- No. 148. The movement of the eyes in reading. M. D. Vernon. 1930.
- No. 149. Tuberculosis in man and lower animals. H. H. Scott. 1930.

 No. 2. The output of women workers in relation to hours of work in shell-making. E. E. Osborne. 1919.
 No. 3. A study of improved methods in an iron foundry. C. S. Myers. 1919.
 No. 4. The incidence of industrial accidents, with special reference to multiple accidents. M. Greenwood, & H. M. Woods. 1919.
 No. 5. Fatigue and efficiency in the iron and steel industry. H. M. Vernon. 1920.
 No. 6. The speed of adaptation of output to altered hours of work. H. M. Vernon. 1920.
 No. 7. Individual differences in output in the cotton industry. S. Wyatt. 1920.
 No. 8. Some observations on bobbin winding. S. Wyatt, & H. C. Weston. 1920.
 No. 9. A study of output in silk weaving during the winter months. P. M. Elton. 1920.
 No. 10. Preliminary notes on the boot and shoe industry. J. Loveday, & S. H. Munro. 1920.
 No. 11. Preliminary notes on atmospheric conditions in boot and shoe factories. W. D. Hambly, & T. Bedford. 1921.
 No. 12. Vocational guidance (a review of the literature) B. Muscio. 1921.
 No. 13. A statistical study of labour turnover in munition and other factories. G. M. Broughton, E. H. Newbold, & E. C. Allen. 1921.
 No. 14. Time and motion study. E. Farmer. 1921.
 No. 15. Motion study in metal polishing. E. Farmer. 1921.
 No. 16. Three studies in vocational selection. B. Muscio, & E. Farmer. 1922.
 No. 17. An analysis of the individual differences in the output of silk-weavers. P. M. Elton. 1922.
 No. 18. Two investigations in potters' shops. H. M. Vernon, & T. Bedford. 1922.
 No. 19. Two contributions to the study of accident causation. E. E. Osborne, H. M. Vernon, & B. Muscio. 1922.
 No. 20. A study of efficiency in fine linen weaving. H. C. Weston. 1922.
 No. 21. Atmospheric conditions in cotton weaving. S. Wyatt. 1923.
 No. 22. Some studies in the laundry trade. M. Smith. 1922.
 No. 23. Variations in efficiency in cotton weaving. S. Wyatt. 1923.
 No. 24. A comparison of different shift systems in the glass trade. E. Farmer, R. C. Brooks, & E. G. Chambers. 1923.
 No. 25. Two contributions to the study of rest-pauses in industry. H. M. Vernon, T. Bedford, & S. Wyatt. 1924.
 No. 26. On the extent and effects of variety in repetitive work. H. M. Vernon, S. Wyatt, & A. D. Ogden. 1924.
 No. 27. Results of investigation in certain industries. 1924.
 No. 29. The effects of posture and rest in muscular work. E. M. Bedale, & H. M. Vernon. 1924.
 No. 30. An experimental investigation into repetitive work. I. Burnett. 1925.
 No. 31. Performance tests of intelligence. F. Gaw. 1925.
 No. 32. Studies in repetitive work with special reference to rest-pauses. S. Wyatt, & J. A. Fraser. 1925.
 No. 33. A study in vocational guidance. F. Gaw, L. Ramsey [et al.] 1926.
 No. 34. A contribution to the study of the human factor in the causation of accidents. E. M. Newbold. 1926.
 No. 35. A physiological study of the ventilation and heating in certain factories. H. M. Vernon, T. Bedford, & C. G. Warner. 1926.

- No. 36. On the design of machinery in relation to the operator. L. A. Legros, & H. C. Weston. 1926.
 No. 37. Fan ventilation in a humid weaving shed. W. Wyatt, J. A. Fraser, & F. G. L. Stock. 1926.
 No. 38. A physiological study of individual differences in accident rates. E. Farmer, & E. G. Chambers. 1926.
 No. 39. The relation of atmospheric conditions to the working capacity and the accident rate of coal miners. H. M. Vernon, T. Bedford, & C. G. Warner. 1927.
 No. 40. The effect of eyestrain on the output of linkers in the hosiery industry. H. C. Weston, & S. Adams. 1927.
 No. 41. Rest pauses in heavy and moderately heavy industrial work. H. M. Vernon, T. Bedford, & C. G. Warner. 1927.
 No. 42. Rest-pauses in industry. S. Wyatt. 1927.
 No. 43. A study of telegraphists' cramp. M. Smith, M. Culpin, & E. Farmer. 1927.
 No. 44. The physique of women in industry. E. P. Cathcart, E. M. Bedale [et al.] 1927.
 No. 45. Two contributions to the experimental study of the menstrual cycle. S. C. M. Sowton, C. S. Myers, & E. M. Bedale. 1928.
 No. 46. A physiological investigation of the radiant heating in various buildings. H. M. Vernon, M. D. Vernon, & I. Lorrain-Smith. 1928.
 No. 47. Two studies on the hours of work. H. M. Vernon, M. D. Vernon [et al.] 1928.
 No. 48. Artificial humidification in the cotton weaving industry. A. B. Hill. 1927.
 No. 49. On the relief of eyestrain amongst persons performing very fine work. H. C. Weston, & S. Adams. 1928.
 No. 50. The physiological cost of the muscular movements involved in barrow work. G. P. Crowden. 1928.
 No. 51. A study of absenteeism in a group of ten collieries. H. M. Vernon, T. Bedford, & C. G. Warner. 1928.
 No. 52. The comparative effects of variety and uniformity in work. S. Wyatt, J. A. Fraser, & F. G. L. Stock. 1929.
 No. 53. The use of performance tests of intelligence in vocational guidance. F. M. Earle, M. Milner [et al.] 1929.
 No. 54. An investigation into the sickness experience of printers (with special reference to the incidence of tuberculosis) A. B. Hill. 1929.
 No. 55. A study of personal qualities in accident proneness and proficiency. E. Farmer, & E. G. Chambers. 1929.
 No. 56. The effects of monotony in work. S. Wyatt, J. A. Fraser, & F. G. L. Stock. 1929.
 No. 57. Further experiments on the use of spectacles in very fine processes. H. C. Weston, & S. Adams. 1929.
 No. 58. Study of heating and ventilation in schools. H. M. Vernon, T. Bedford, & C. G. Warner. 1930.
 No. 59. Sickness amongst operatives in Lancashire cotton spinning mills. A. B. Hill. 1930.
 No. 60. The atmospheric conditions in pithcad baths. H. M. Vernon, T. Bedford, & C. G. Warner. 1930.
 No. 61. The nervous temperament. M. Smith, & M. Culpin. 1930.
 No. 62. Two studies of absenteeism in coal mines. H. M. Vernon, & T. Bedford. 1931.
 No. 63. Inspection processes in industry. S. Wyatt, & J. N. Langdon. 1932.
 No. 64. A classification of vocational tests in dexterity. A. E. Weiss Long, & T. H. Pear. 1932.
 No. 65. Two studies in the psychological effects of noise. K. G. Pollock [et al.] 1932.
